Udemy

PERSONAL PROJECTS

Nand2Tetris Projects Based Course - (Python)

Project - ([Github](#)).

- Learned how a computer works from the hardware to the software
- Designed chips and implemented them to create the CPU and RAM
- Created a compiler, virtual machine translator, and assembler

Blackjack Web Game - (HTML, CSS, JS)

Project ([Live](#)) - ([Github](#)).

- Built a graphical game of Blackjack with complete game functionality
- Deployed live to the web via Github Pages
- Dynamically displays playing cards and score

Baseball Card Data Website - (Python w/Django)

Project ([Github](#)).

- A webpage connected to a database via an API to display baseball card data
- Uses Django backend framework for routing the frontend and backend together
- Runs a script to populate the database with card data from a csv file

WORK EXPERIENCE

Service Manager

Chipotle

2019-2022

- Assisted the General Manager with providing quality service and with managing a group of 20-30 members
 - Responsibilities included: Fixing broken equipment (Electronics, stove, etc.), ensuring food met safety standards, overseeing restaurant inventory, and running the restaurant during my shifts
 - Oversaw the implementation of a digital ordering system that became 50% of sales during my tenure
-
