Coursera
- Python 3 - February, 2023
Codecademy
- Data Structures & Algorithms -
December, 2023
Udemy

PERSONAL PROJECTS

Full-Stack Library Web App - (MongoDB, NodeJS, Express, Handlebars)

Project - ([Live](#)) - ([Github](#))

- Designed and developed a full-stack Library web app that allows users to create book objects and store notes to view anytime
- Developed a REST API to integrate the database with the frontend
- Implemented an account verification system with JSON web tokens
- Uses a responsive design and real-time updates for a smooth user experience
- Deployed on AWS via EC2 instance with HTTPS and a custom domain

MLB Web App - (React, HTML, CSS, JS)

Project - ([Live](#)) - ([Github](#))

- Baseball stats website with visual components for enhanced UX
- Utilized React components, state, and props
- Real-time updates of stats, data, and games via MLB API
- Used SVG to visualize the current state of each game from live-feed

Nand2Tetris Projects Based Course - (Python)

Project - ([Github](#))

- Learned how a computer works from the hardware to the software
- Designed chips and implemented them to create the CPU and RAM
- Created a compiler, virtual machine translator, and assembler

WORK EXPERIENCE

Service Manager

Chipotle

2019-2022

- Assisted the General Manager with providing quality service and with managing a group of 20-30 members
 - Responsibilities included: Fixing broken equipment (Electronics, stove, etc.), ensuring food met safety standards, overseeing restaurant inventory, and running the restaurant during my shifts
 - Oversaw the implementation of a digital ordering system that became 50% of sales during my tenure
-
