PROFESSIONAL SUMMARY

Full-stack software engineer currently pursuing an M.S. in Computer Science. Experienced building and deploying production web applications using modern JavaScript frameworks, RESTful APIs, and cloud infrastructure. AWS certified with a strong foundation in both front-end and back-end development.

EDUCATION

M.S. Computer Science – University of Texas at Austin (Online) | Expected 2028

B.S. Computer Science – Southern New Hampshire University (Online) | Graduated May 2025 | GPA: 3.70 / 4.0

B.S. Finance & Accounting – Southern New Hampshire University (Online) | Graduated January 2023

WORK EXPERIENCE

AI Trainer (Contract)

DataAnnotation | May 2026 – Present

- Evaluated AI-generated responses for accuracy, logical consistency, and relevance across a variety of prompts and tasks.
- Reviewed and compared model outputs to identify higher-quality solutions based on reasoning and instruction adherence.
- Conducted quality assurance on generated content by identifying factual errors, inconsistencies, and unclear outputs.
- Applied domain knowledge across technical and non-technical subject areas to assess response quality and flag systematic model weaknesses.

Software Engineer (Freelance)

Self-Employed | Oct 2025 – Jan 2026

- *React · Node.js · Express · TypeScript · JavaScript · HTML · PostgreSQL · Stripe · Shippo · AWS*
- Designed, configured, and deployed a full-stack ecommerce application, managing the full SDLC from requirements gathering through production release.
- Built and maintained RESTful API integrations between a React frontend and Node.js backend, ensuring accurate data flow and reliable system performance.
- Integrated third-party APIs (Stripe, Shippo) for payment processing and shipping, evaluating impact and testing changes prior to deployment.
- Authored technical documentation covering system architecture, API integrations, and deployment procedures to support long-term maintainability.

SKILLS

Programming: JavaScript, Python, TypeScript, HTML, CSS, C, SQL, Java

Technologies: React, Linux, Git, AWS, MongoDB, Express, Node.js, PostgreSQL, REST APIs, Claude, AI

AWARDS & CERTIFICATIONS

- AI Engineer for Developers Certificate – DataCamp (In Progress)
- AWS Certified Cloud Practitioner
- President's List – Summer & Fall 2023, 2024
- Dean's List – Spring & Winter 2022
